Understanding the Report

The Insights Report offers an innovative approach to listening to social media conversations. This custom-made report allows the brand to monitor the conversations that occur during the monitoring period mentioned above.

This report helps in tracking and monitoring your company reputation by exploring what people are saying about your business across a gamut of social channels and online communities.

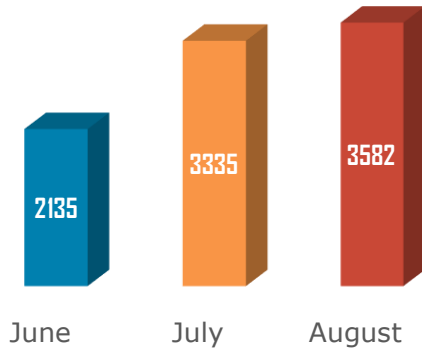

Sentiment analysis identifies and categorizes opinions expressed on a post and helps determine whether the attitude towards a particular brand/ product is positive, negative, or neutral. In addition, the report also provides social ROI with 4 key audience engagement metrics -Awareness, Acquisition, Activation and Satisfaction.

This report, however has certain limitations. Only publicly available information is included in the report – thus adhering to the privacy rules. The sample report doesn't include competitor analysis, influencer profiling, or other custom sections.
